The Punjab School
2016-2019

DETAILED DESCRIPTION

As a computer science student at FAST University, I am pleased to offer my expertise in web development to help you bring your digital ideas to life. With a strong foundation in web technologies and programming languages, I am equipped to create dynamic and engaging websites tailored to your specific needs. My web development services encompass front-end development. On the front-end, I specialize in crafting visually appealing and user-friendly interfaces using HTML, CSS, and JavaScript. I pay attention to details, ensuring that the design is responsive, intuitive, and optimized for an exceptional user experience across devices. In addition to front-end development, I excel in back-end development to power your website with robust functionality. Using languages like PHP, Python, or Node.js, I can build server-side applications, handle databases, and integrate complex functionalities to meet your business requirements.
